Kempower customer segments

Charger location > Publicly available charging network

Charger location > En-route & overnight charging

Charger location > Various locations

Fast is better than slow

We offer modular, scalable, dynamic & user-friendly charging solutions

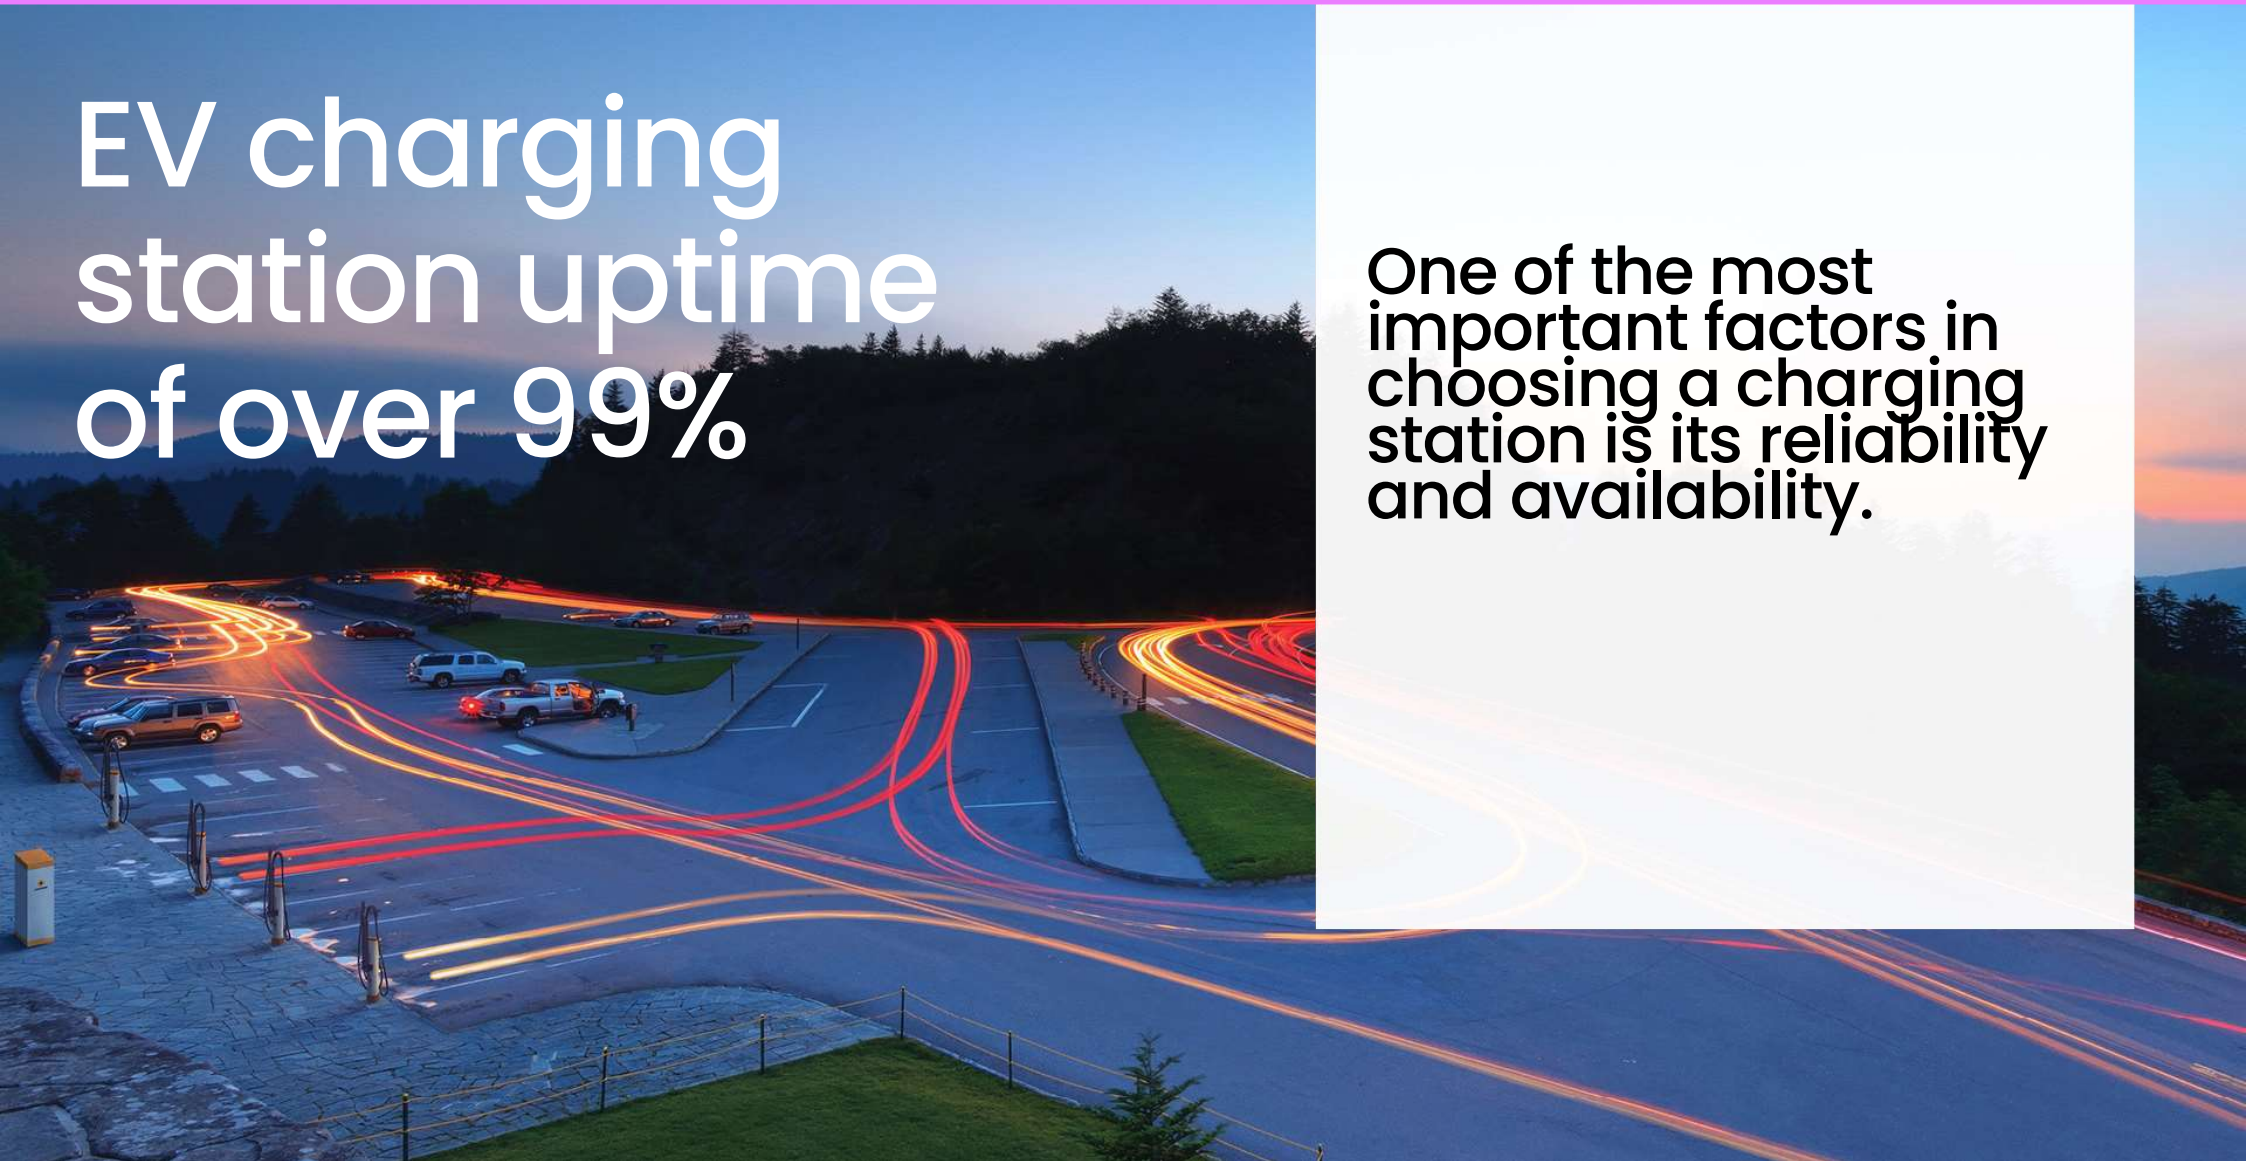

Fast is better than slow

EV charging station uptime of over 99%

One of the most important factors in choosing a charging station is its reliability and availability.

Case: Powerdot

Creating the largest retail fast-charging network in Europe

Powerdot, a Portuguese charge point operator (CPO) is currently leading its home market and is also a significant player in Spain, Belgium, and Poland. In France, Powerdot is among the top three CPOs providing fast-charging above 100kW to EV drivers.

Case: WattHub

The world's largest fast-charging plaza for electric trucks and off-highway vehicles

WattHub is not only a testament to the pioneering development in EV infrastructure but also a significant step towards sustainable energy solutions for heavy industry.

Thank You.
